

Dear Sir or Madam

I am keen to work for your company because of its outstanding reputation. I am interested in any engineering position in water, environment or infrastructure in Australia.

I am currently working for MGA in UK as a Civil Engineer in the Dam and Geotechnics Division. I was offered this position following successful completion of a prestigious international double-degree programme combining an MSc in Water Management and MEng in Civil Engineering. Previously I have been employed as a Project Manager and Technical Consultant in the Czech Republic. For more details, please refer to my CV.

Although I am happy in my current occupation, I am keen to pursue the opportunity of adapting my skills in the challenge of a new environment. I am keen to realise my ambition to work on a diverse range of projects in Australia with its extraordinary environment and different lifestyle.

I believe that my qualifications and skills build upon five-years of work experience in civil engineering and my personal attributes match the requirements you seek for this role. I think that I would be able to effectively contribute to the team and the organisation.

I would very much appreciate your consideration. I look forward to hearing from you.

Yours faithfully,

Jan Novak
